

WAYNE VACUUM AUTOMATION SPARE PARTS AND RETROFIT

Presented by:
Wayne de Bruyn

Your Trusted Partner for Vacuum Automation Replacement Spare Parts, Customised Solutions and Support

We possess in-depth knowledge of food manufacturing and packaging processes, as well as stringent hygiene standards and regulations. Our products are designed with this expertise in mind, prioritising safe food handling and processing.

At Wayne, we specialise in designing and manufacturing precision-engineered replacement parts to support automated packaging operations in diverse sectors in Southern Africa. Our bespoke solutions optimise handling and packaging efficiency, tailored to meet specific customer needs. By partnering with us, you'll benefit from:

- Enhanced equipment performance
- Reduced maintenance and downtime
- Improved product safety and quality

What Sets Us Apart

At **WAYNE**, we're dedicated to delivering exceptional service, support, and solutions that meet the unique needs of our customers. Our commitment to innovation, quality, and customisation enables us to provide top-tier solutions that:

- Maximise equipment lifespan
- Minimise operational costs
- Boost productivity

Our product range includes:

- **Vacuum Suction Cups:** Durable and flexible, ensuring secure handling for diverse applications.
- **Cup Adapters:** Precision-designed for seamless integration with various machinery and equipment.
- **Filling Head Rubbers:** High-quality, food-grade materials ensure reliable performance and hygiene.
- **Small Keyway Rollers:** Engineered for smooth operation and minimal maintenance.
- **Capping Pads:** Precision-crafted for optimal performance and durability.
- **Discs and Seals:** Custom-designed for precise application and secure sealing.
- **Conveyor Bumpers:** Durable and shock-absorbing, protecting equipment and ensuring smooth operation.
- **Customised Parts:** Tailored solutions to meet specific customer needs and applications.

By choosing Wayne, you'll gain a trusted partner with extensive industry expertise, a customer-centric approach, and a passion for delivering tailored solutions that drive business success.

Industries Served

WAYNE serves companies across various industries within the production and packaging sector, providing precision-crafted OEM-compatible replacement spare parts for machines situated in:

- Dairy
- Poultry
- Food and Beverage
- Bakery
- Fruit
- Wine
- Edible Oils
- Pharmaceutical
- Personal Care
- Cosmetics
- Energy
- Packaging
- Printing
- Paper and Corrugated Board
- Converters
- Chemicals
- Industrial Lubricants
- Paints

Our products are manufactured to meet specific customer needs or applications, ensuring optimal performance and reliability.

Industry Impact

WAYNE's products are designed to deliver measurable benefits:

- **Reduced Downtime:** Increasing productivity by minimizing disruptions.
- **Improved Safety and Quality:** Compliant with the highest standards for sensitive industries.
- **Enhanced Efficiency and Cost Saving:** Maximizing performance and reducing operational costs.
- **Local Service and Support:** Buying direct from WAYNE eliminates import challenges and contributes to job creation and growth of micro-manufacturing in South Africa coupled with local field service and technical support.

WAYNE is a valued partner to the industry here to help you to optimize your machines in the local and overseas market,

let's connect!

Commitment to Excellence

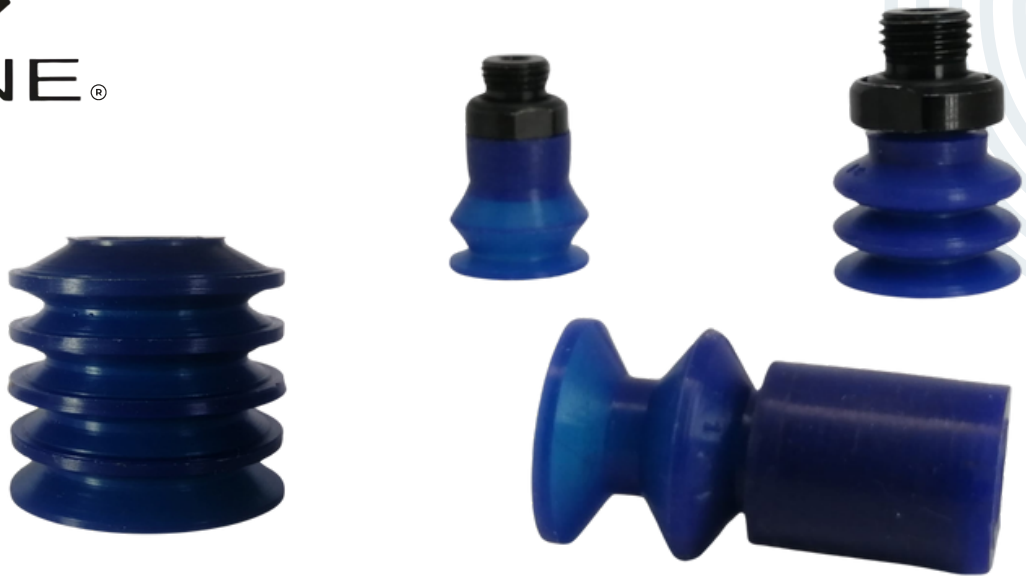

At **WAYNE** we understand the importance of maintaining product integrity in food, beverage, and pharmaceutical production, processing, and packaging. We apply:

- Good Manufacturing Practices (GMP's)
- Quality checks throughout all processes
- Just-in-time manufacturing practices

Use approved food and pharmaceutical-grade materials (FDA-approved)

Key Benefits

Our products are crafted with precision and dedication, offering:

- Seamless integration with existing machinery
- Rapid turnaround times and short delivery lead times
- Durable, reliable performance
- Compliance with food and pharmaceutical packaging regulations

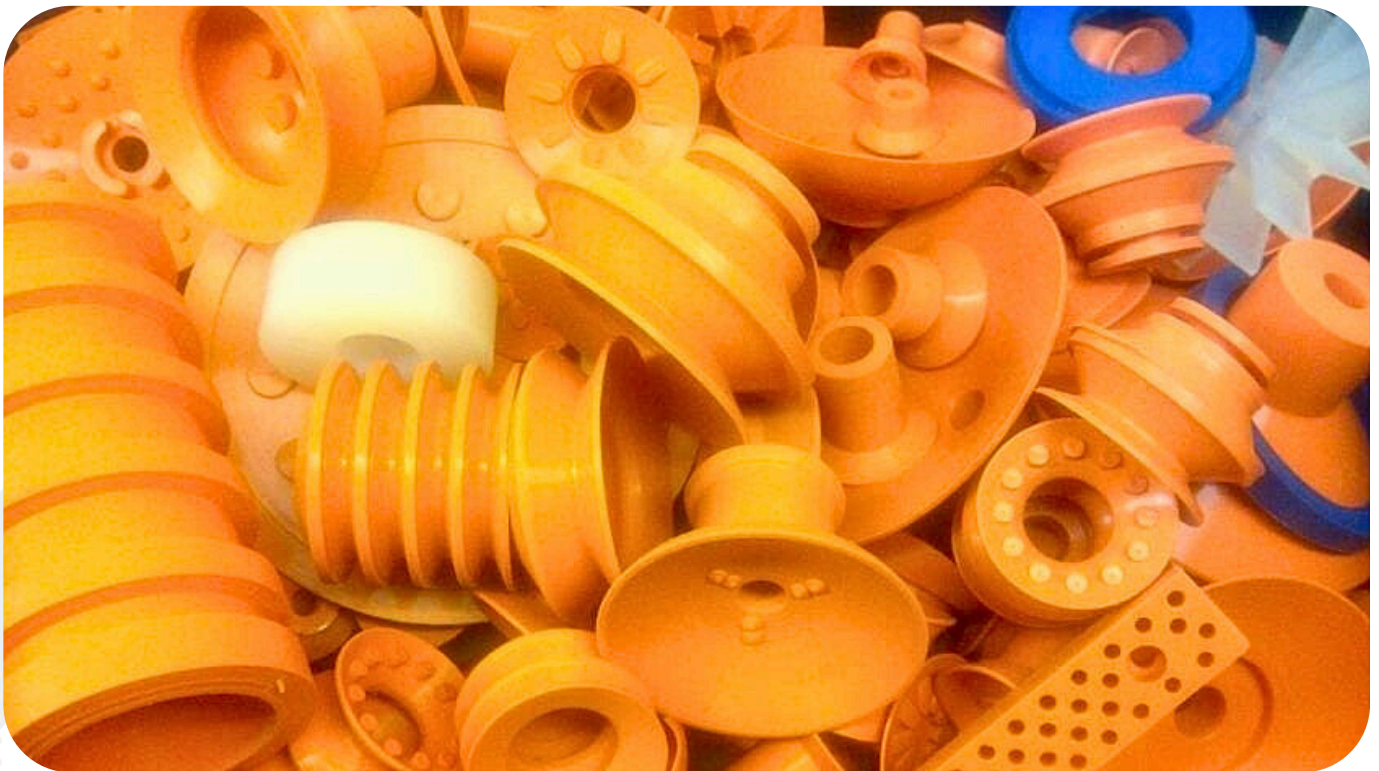

Your Trusted Partner

Trust **WAYNE** to deliver high-quality replacement spare parts, expertly manufactured to meet your unique needs. Let's collaborate to optimise your operations and drive business success.

WAYNE is committed to partnering with industry partners and clients to provide bespoke solutions that drive business growth, improve efficiency, and enhance productivity.

Technical Services

We offer the following services to support your business:

- **Customer Consultation, Engineering and Support:** Schedule an appointment to discuss your needs.
- **All products are 100% Manufactured in-house:** Complete in-house control of design, manufacturing and controls of all products.
- **Prototyping, Reverse Engineering & Retrofitting:** Bespoke Spare parts are precision engineered to suit your application or we can modify our existing vacuum suction cups, rollers, and related products in accordance to your requirement.
- **Product Inventory Management:** Streamline your operations, we can allocate item coding and stock holding for you that can be called off.
- **Contract Manufacturing:** Partner with WAYNE to deliver on your requirements.

WAYNE is situated in Cape Town and deliveries are available all over South Africa.
